Experience

Development manager • Renterus   April 2024 - Present

Leading and actively developing for mobile and web applications, I focus on system architecture and hands-on coding, ensuring the delivery of robust, scalable solutions.

I steer both our in-house and freelance developers across various project sections, integrating cohesive and innovative development practices.

Fullstack developer • Renterus   Jan 2024 - April 2024

Mobile app development and deployment using React Native.
Design and development of microservices arquitecture backend using Nodejs and PHP.
Database management (MongoDB and MySQL).
Migrating web project from php to Nextjs.

React developer • Power bargain   Oct 2021 - Oct 2022

Worked with the UX/UI team to develop a web app that let users publish their products to different online marketplaces all at once. Developed different API endpoint using Firebase Functions and Typescript and helped to lead different Freelancers.

Software engineer intern • Rocketfy   Nov 2019 - June 2020

Worked with the UX/UI team to develop a web app that let users publish their products to different online marketplaces all at once. Developed different API endpoint using Firebase Functions and Typescript and helped to lead different Freelancers.

Software engineer intern • QIPRO Soluciones   Feb 2019 - June 2019

Worked with the UX/UI team to develop a web app that let users publish their products to different online marketplaces all at once. Developed different API endpoint using Firebase Functions and Typescript and helped to lead different Freelancers.
